To: jalgaonweb@gmail.com

Hi 49Club

Thanks for being a PythonAnywhere customer!

You just changed your account features. Here are the features that you now have on your account:

 CPU time per day: 10000 seconds
 Number of web apps: 3
 Number of web workers: 25
 Number of always-on tasks: 1
 Disk space: 53 GB

These features will cost you $99.00 per month.

Happy Pythoning!

We need to provide you with the following information to comply with legislation:

1. We will provide you with a PythonAnywhere account, which allows you to run your code on our servers,
   including creating one or more public websites.
2. This will cost you $99.00 per month unless you switch to a different kind of account on our "Accounts" page.
3. This is to remind you that, if you are an EEA consumer, you may have the right to cancel the contract (that is,
   to delete your account) within 14 days of concluding the contract. (This right does not apply in certain
   circumstances, e.g. contracts which are completed.) You must send us clear statement saying that you wish to
   cancel via email to PythonAnywhere Support <liveusercare@pythonanywhere.com>. We will refund all
   payments within 14 days thereafter but, if you agreed to us beginning services during the cancellation period,
   we will deduct reasonable costs to cover the services we performed. For full details, please see our terms and
   conditions. This is separate from our (actually more generous) 30-day no-questions-asked money-back
   guarantee.
4. You can end the contract at any time as explained on our service. This does not give rise to a refund unless
   "cooling off" rights apply.
5. You may be entitled to use an EU online dispute resolution service to assist with any contractual dispute you
   may have with us. This service can be found here.
